PROFESSIONAL SUMMARY

PHP/Laravel Developer with 3+ years of experience in full-stack web development, RESTful API design, and database optimization (MySQL, MSSQL). Proven track record delivering production systems across enterprise, government, and banking sectors. Hands-on experience with the full SDLC including system design, development, SIT/UAT testing, deployment, and production support. Delivered RM160,000 in operational cost savings through system automation at current role.

KEY ACHIEVEMENTS

- Reduced operational costs by RM160,000 annually by developing Galileo SFA system, automating manual order processing and pallet tracking workflows across Lein Hing Holdings group.
- Rebuilt ePrestasi government HR system from legacy framework to Laravel 8 MVC architecture, modernizing staff performance tracking for Jabatan Kesihatan Negeri Sembilan.
- Delivered UOB CPF/SRS core banking system enhancements via Accenture, completing full test cycles (Unit Testing, SIT, UAT) across 15-month engagement with zero critical post-deployment defects.

WORK EXPERIENCE

Lein Hing Holdings Sdn Bhd

Dec 2023 – Present

Application Developer and Analyst

- Developed and maintained Galileo SFA (Laravel 11) and Galileo core business system (Core PHP), supporting daily operations across multiple business entities under Lein Hing Holdings group.
- Designed and implemented RESTful APIs and backend services for seamless system integration, improving data flow between web and mobile platforms (Flutter/Android).
- Optimized MSSQL and MySQL database queries and indexing strategies, reducing query execution time and improving application performance for production systems.
- Troubleshoot and resolved ERP production issues (Microsoft Dynamics SL 2018) through root cause analysis and server log investigation, minimizing system downtime.
- Reduced operational costs by RM160,000 through Galileo SFA automation, eliminating manual order processing and centralizing pallet tracking.

Accenture Technology Solutions

Jun 2022 – Dec 2023

IT Operations Associate / Manual Tester

- Developed and enhanced UOB CPF/SRS core banking system features using COBOL/RPG on AS400 platform, managing change requests based on Functional Specification Documents (FSD).
- Prepared and executed Unit Testing, SIT, and UAT test scripts ensuring system quality and compliance; coordinated deployment and documentation sign-off for smooth production releases.
- Collaborated with cross-functional project teams to resolve defects and deliver change requests on schedule throughout 15-month banking system engagement.

Jabatan Kesihatan Negeri Sembilan

May 2021 – May 2022

PHP Laravel Developer / IT Support

- Rebuilt ePrestasi staff performance management system from legacy ATK framework to Laravel 8 MVC architecture with MySQL, Bootstrap 5, jQuery, and Eloquent ORM.

- Provided first-line IT support managing end-to-end incident resolution via eMaintenance ticketing system including troubleshooting, vendor escalation, and service closure.

True Capital Asia Sdn Bhd

Feb 2020 – Jul 2020

Software Engineer

- Contributed to TenderNiaga contractor financing platform, developing frontend PHP pages and supporting backend logic as part of a collaborative dev team using Git version control.

Wonder Pod Sdn Bhd

Jul 2019 – Dec 2019

Junior IT / Internship Trainee

- Maintained and performed quality control on client websites (Renault, All Japan Tours, Ayamas), ensuring functionality, performance, and content accuracy using WordPress CMS.

KEY PROJECTS

Galileo SFA | Laravel 11, jQuery, Metronic | Lein Hing Holdings

- Built Sales Force Automation system streamlining order processing and field tracking; contributed to RM160,000 in annual operational cost savings.

CP Employee Offboarding System | Laravel, jQuery, Metronic | Lein Hing Holdings

- Designed HR automation module to streamline employee offboarding and reduce manual administrative workload.

Document Approval System | Laravel, jQuery, Metronic | Lein Hing Holdings

- Developed workflow-based document approval system improving processing efficiency and audit tracking.

CPF/SRS Core Banking System | COBOL/RPG, AS400 | UOB via Accenture

- Enhanced enterprise pension and retirement banking system; managed full test lifecycle (Unit Test, SIT, UAT) for production-grade banking software.

ePrestasi HR System | Laravel 8, Bootstrap 5, MySQL | Jabatan Kesihatan Negeri Sembilan

- Rebuilt government staff performance tracking system from legacy framework to modern Laravel 8 MVC architecture with relational database design.

TenderNiaga Contractor Financing Platform | PHP, HTML, CSS, Bootstrap | True Capital Asia

- Contributed frontend and partial backend development for contractor loan application platform using Git-based team workflow.

TECHNICAL SKILLS

Backend: PHP, Laravel (v8–v12), Core PHP, RESTful API Development, MVC Architecture, SDLC

Frontend: HTML, CSS, JavaScript, jQuery, Bootstrap, Metronic

Mobile: Flutter (Android)

Database: MySQL, Microsoft SQL Server (MSSQL), T-SQL, Query Optimization, Eloquent ORM

ERP: Microsoft Dynamics SL 2018

Legacy Systems: COBOL/RPG, AS400

Testing: Unit Testing, SIT, UAT, Debugging, Manual Testing

Tools: Git, Bitbucket, JIRA, Confluence, ClickUp, VS Code, Excel Power Pivot

EDUCATION

University Malaysia Terengganu

Aug 2016 – May 2019

Bachelor of Computer Science (Hons) – Software Engineering
